

Exploring Hand-to-Hand Combat

Exploring Hand-to-Hand Combat

![[Cover]](h7fig:cover)

****For personhood — the embodied human, not vehicles.****

Unarmed combat, grappling, and every martial family Hostess 7 trains on the humanoid motion lattice.

- ****Updated:**** 2026-06-30T22:00:38Z

- ****Paired book:**** **Exploring Weaponized Combat** (firearms, knives, personal weapons)

- ****Not in scope:**** military vehicles — see **Exploring Military Vehicles**

- ****Disclaimer:**** Educational martial arts and defense doctrine only — not instructions to harm. Lawful self-defense where permitted by jurisdiction; de-escalation and retreat when possible. Not military operational orders. No capability employment without Ironclad corroboration.

1. Personhood scope

- This book is for the ****embodied person**** — stance, limbs, proprioception, breath, balance.
- Vehicles, mounted weapons platforms, and armor carriages belong in the vehicles shelf.
- Hostess 7 reads this through Ironclad + library truth gate before teaching combat counsel.
- Motion training (``humanoid-motion-training.py``) loads skills named in this book.

2. Foundations — stance to strategy

| Concept | Definition | Training hook |

| --- | --- | --- |

| Stance | Base of support — foot placement, knee soft, hips square | Horse stance, orthodox/southpaw |

| Balance | Center of mass over base; recover from perturbation | Single-leg drills, ukemi |

| Distance | Measure between fighters — kicking, punching, clinch ranges | Footwork ladders |

| Timing | Rhythm, feint, counter-window | Double-end bag, reaction drills |

| Lines | Centerline, power line, structural weak axes | Wing Chun centerline guard |

| Breath | Exhale on exertion; avoid breath-hold under stress | Kiai discipline, recovery |

3. Mobility & flexibility

- Touch toes — hip hinge, spinal flexion, hamstring lengthen, toe reach
- Forward fold — sustained posterior chain loading
- Cat-cow — spinal wave, lumbar and cervical mobility
- All mobility skills tie to body zones: head → spine → hips → knees → ankles → toes

4. Martial families (overview)

****mobility**** — Flexibility — bend, hinge, touch toes, spinal flexion
****kung_fu**** — Chinese martial arts — centerline, forms, sticky hands
****mma**** — Mixed rules — clinch, ground, cage awareness
****striking**** — Punches, kicks, elbows, knees
****grappling**** — Throws, submissions, positional control
****defense**** — Blocks, slips, counters — lethal only when corroborated

5. Striking arts

Art	Origin	Signature techniques	Ruleset notes
Boxing	Western	Jab, cross, hook, uppercut, slip, roll	Ring, gloves, rounds
Muay Thai	Thailand	Teep, round kick, elbow, clinch knee, check	8-point striking
Karate / Taekwondo	Okinawa / Korea	Linear strikes, kata, kicking	Point vs full contact
Krav Maga	Israel	Defense-V, groin kick, retzev — ****lethal gate: corroborated threat only****	Street-oriented; legal frame varies

6. Kung fu & Chinese arts

Style	Focus	Motion primitives
Wing Chun	Centerline, sticky hands	Chain punch, pak sao, tan sao, biu jee, chi sao
Hung Gar	Five animals, iron bridge	Tiger claw, horse stance, iron bridge
Shaolin Quan	Long fist, explosive movement	Long fist, monkey step, iron palm, jump kick
Tai Chi	Root, yield, redirect	Ward off, roll back, push, single whip

7. Grappling — Brazilian Jiu-Jitsu & beyond

- ****Brazilian Jiu-Jitsu (BJJ)**** — guard, guard pull, pass guard, mount, side control, back control
- Submissions — armbar, triangle, rear-naked choke, kimura, americana (educational anatomy frame)
- Positional hierarchy — position before submission; escape priorities
- ****Judo**** — osoto gari, uchi mata, seoi nage, kuzushi, newaza pins
- ****Wrestling**** — single leg, double leg, snap down, sprawl, pin
- Ground vs stand — when to pull guard vs when to sprawl (sport vs self-defense context)

8. MMA — mixed martial arts

- Integrates striking, clinch, takedown, ground-and-pound, submissions
- Cage awareness — cutting angle, wall walks, fence wrestling
- Skill load: jab-cross, double leg, guillotine, ground pound, sprawl
- Train on humanoid motion lattice — proficiency grows by ticks under gravity, not instant Matrix load

9. Lawful self-defense & de-escalation

- Jurisdiction varies — proportionality, duty to retreat where applicable
- De-escalation first — voice, distance, exit path, bystander safety
- Imminent threat standard — educational framing, not operational orders
- Aftermath — medical aid, report, legal counsel; trauma-informed recovery

10. Tactical awareness (unarmed)

Framework	Steps	Field use
OODA	Observe → Orient → Decide → Act	Break opponent loop with tempo change
Cover vs concealment	Stops rounds vs hides only	Unarmed: use barriers for escape
Situational awareness	Exits, hands, groups, terrain	Pre-fight cues — posture, targeting
Multiple attackers	Stacking, fence, escape wedge	Footwork to single-file

11. Conditioning for personhood

- Energy systems — aerobic base, alactic power, glycolytic repeatability
- Neck, grip, core — grappling durability
- Mobility maintenance — touch toes cycle ties to self-maintenance body_cycle
- Recovery — sleep, hydration, deload weeks; injury prevention over ego

Humanoid motion skill lattice

Skill	Family	Primitives
Touch toes	mobility	hip_hinge, spinal_flexion, hamstring_lengthen, toe_reach
Forward fold	mobility	spinal_flexion, hip_hinge, hamstring_lengthen
Cat-cow spinal wave	mobility	spinal_wave, lumbar_mobility, cervical_mobility
Wing Chun	kung_fu	chain_punch, pak_sao, tan_sao, biu_jeet, chi_sao
Hung Gar	kung_fu	tiger_claw, iron_bridge, horse_stance, five_animals
Shaolin Quan	kung_fu	long_fist, monkey_step, iron_palm, jump_kick
Tai Chi	kung_fu	ward_off, roll_back, push, single_whip
MMA — Mixed Martial Arts	mma	jab_cross, double_leg, guillotine, ground_pound, sprawl
Boxing	striking	jab, cross, hook, uppercut, slip, roll
Muay Thai	striking	teep, round_kick, elbow, clinch_knee, check
Brazilian Jiu-Jitsu	grappling	armbar, triangle, rear_naked_choke, guard_pull, pass_guard
Judo	grappling	osoto_gari, uchi_mata, seoi_nage, kuzushi, newaza_pin
Wrestling	grappling	single_leg, double_leg, snap_down, sprawl, pin
Krav Maga	defense	defense_v, groin_kick, eye_strike, weapon_disarm, retzev
