

Exploring Weaponized Combat

Exploring Weaponized Combat

![[Cover]](h7fig:cover)

****For personhood — personal weapons wielded by the embodied human, not vehicle mounts.****
Firearms, knives, edged tools, impact weapons, and less-lethal recognition — whole understanding.
- ****Updated:**** 2026-06-30T22:00:38Z
- ****Paired book:**** *Exploring Hand-to-Hand Combat* (unarmed and grappling arts)
- ****Not in scope:**** tanks, aircraft, naval platforms — see *Exploring Military Vehicles*
- ****Disclaimer:**** Educational martial arts and defense doctrine only — not instructions to harm. Lawful self-defense where permitted by jurisdiction; de-escalation and retreat when possible. Not military operational orders. No capability employment without Ironclad corroboration.

1. Personhood scope

- This book covers ****weapons the person carries and wields**** — hands, holsters, belts, pockets.
- Vehicle-mounted ordnance, crew-served systems, and platform logistics are out of scope.
- Educational mechanics and recognition — ****not**** operational orders to harm.
- Every technique assumes lawful context where applicable; de-escalation preferred.

2. Force continuum

Level	Means	Legal sensitivity
Presence	Posture, voice, distance	Lowest force
Soft control	Joint locks, escorts (trained roles)	Policy-dependent
Less-lethal	OC spray, conducted energy device	Misuse recognition; jurisdiction
Edged / impact	Knife, baton, improvised	Proportionality critical
Firearms	Handgun, rifle, shotgun	Highest scrutiny — lawful use only

3. Edged weapons — knives & blades

Type	Traits	Recognition / safety
Folding knife	Pocket carry, one-hand open (where legal)	Lock type, blade length laws
Fixed blade	Stronger lockup, sheath carry	Draw path, retention
Kitchen / utility	Improvised edge	Environmental awareness
Bayonet / fighting knife	Historical and modern fighting forms	Educational anatomy of thrust vs slash
Multi-tool blade	Utility first	Not a fighting tool by design
- Grip — saber, hammer, ice-pick (educational recognition)
- Lines of attack — high, low, diagonal; centerline vulnerability
- Distance — edge beats empty hand at contact; closing vs fleeing
- Pair with hand-to-hand — weapon retention and disarm ****education only****

4. Impact weapons

- Batons — straight, side-handle; target zones and policy frames
- Improvised — flashlight, keys, furniture; legal risk elevated
- Staff / stick arts — range advantage, two-handed power
- Shielding with objects — bag, chair, cart (escape-first doctrine)

5. Firearms — whole understanding (personhood)

- **Purpose** — educational mechanics: how systems work, not combat orders
- **Safety rules** — treat every firearm as loaded; muzzle discipline; finger off trigger; know target and beyond
- **Handgun** — semi-auto vs revolver; magazine, slide, trigger, sights; concealed carry legal variance
- **Rifle** — carbine platforms; sight picture; zeroing concept; two-handed platform
- **Shotgun** — spread pattern by range; pump vs semi; home-defense **legal** framing only
- **Ammunition** — caliber, grain, hollow-point vs FMJ (educational); barrier penetration awareness
- **Malfunctions** — tap-rack-bang concept; stop if uncertain
- **Storage** — locked, separated, child-safe; owner responsibility

6. Firearms table (recognition)

Platform	Role	Personhood carry notes
Compact handgun	Concealed carry class	Holster types — IWB, OWB; retention levels
Full-size handgun	Duty / home	Grip fit, magazine capacity laws
PDW / pistol-caliber carbine	Personal defense	Two-hand stability, brace laws vary
Rifle (AR-pattern, bolt, lever)	Sport, hunting, defense where legal	Sling, optic co-witness
Shotgun (pump/semi)	Home, sport	Length of pull, choke, minimum safe distance

7. Less-lethal recognition

- OC spray (pepper) — Scoville, stream vs fog, cross-contamination, wind
- Conducted energy device (Taser-class) — probe spread, drive stun, failure modes
- Stun devices — contact pain compliance; misuse patterns
- Hostess 7 combat battery domain: `weapons\_education` — recognition not deployment orders

8. Weapon retention & transition

- Holster retention levels — snap, thumb break, SERPA debate (educational)
- Grappling with weapons — foul cover, hip carry vulnerability
- Transition — handgun to knife is policy and law constrained

- Always prefer de-escalation and escape when personhood safety allows

9. Pairing with hand-to-hand

Scenario	Hand-to-hand book	This book
Clinch	Knees, throws, wall work	Retention, foul cover
Ground	BJJ positions	Holster guard, back control weapon access
Standoff	Footwork, feints	Distance, draw timing (lawful)
Multiple threats	Angle, escape wedge	Capacity, reload awareness

10. Ethics & law (educational)

- Proportionality — response matches threat level where law requires
- Brandishing, open carry, concealed carry — jurisdiction-specific
- Prohibited persons — educational awareness, not legal advice
- Aftermath — secure scene, aid injured, invoke counsel, document
